

EXECUTIVE SUMMARY

SCOTTYAB/ROOTBEER PROJECT

Date: 2025-08-31
Prepared by: Sebastien Laifa
Repo link: <https://github.com/seblaifa3315/msrLab>

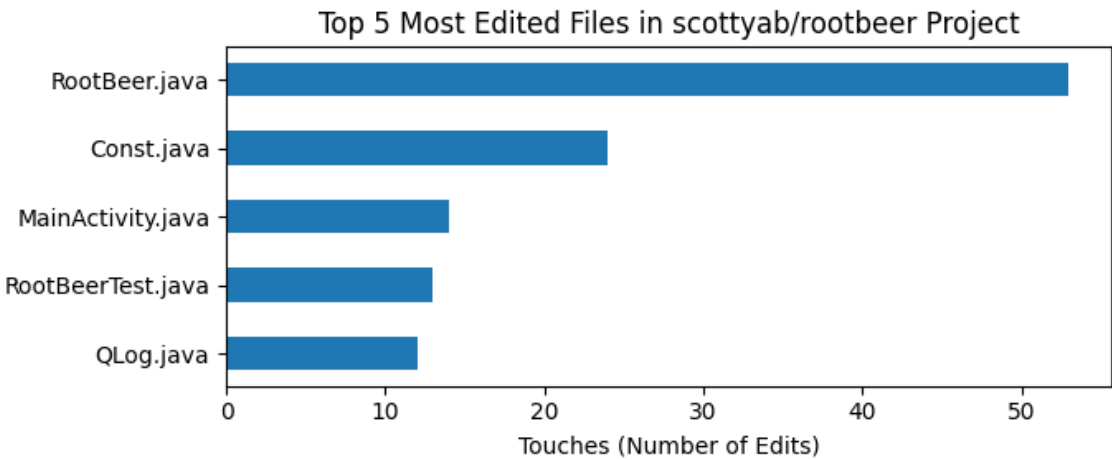

OVERVIEW

This report analyzes file activity in the scottyab/rootbeer repository. Only source files, defined here as **.java** and **.kt** files, which contain the main logic of the library and sample apps, were included in the analysis.

DEVELOPER CONTRIBUTION

Developers	Period	Activity
Scott Alexander-Bown	2015-2024	Lead maintainer; core library & sample app; resumed activity in 2024 with major updates across 10+ files.
Matthew Rollings	2015-2021	Heavy contributor to library internals (RootBeer.java, Const.java, RootBeerNative.java, QLog).
Artsem Kurantsou	2024	Contributed to MainActivity.kt, RootSampleApp.kt, and UI adapter.
Daniel Kutik	2019-2020	Tests and Android sample integration.
Other	2016-2018	Small one-off commits (Frieder Bluemle, Andy Barber, altvnx, etc.); inactive since.

FILES ACTIVITY HIGHLIGHTS

USEFUL GIT COMMANDS

As a beginner, the following commands were most helpful:

- `git log` → view commit history.
- `git status` → check the state of the repository.
- `git diff` → see changes between commits.
- `git show` → inspect details of a specific commit.
